

Code-Layout, Readability and Reusability

Date	30 September 2026
Team ID	SWTID-2026-9157
Project Name	CRICKSTATS, the Cricket Player Performance Tracking Application
Maximum Marks	5 Marks

CRICKSTATS · Code-Layout, Readability and Reusability:

This section describes the code and component organization used in CRICKSTATS, the Cricket Player Performance Tracking Application. Salesforce objects, fields, Lightning App components, Roll-Up Summary, and Screen Flow are organized so the project is easy to understand, maintain, and extend.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Naming	Player, Match Performance and Flow names are clearly defined.	Yes	Uses clear Salesforce naming.
2	Proper Structure	Objects, fields, tabs, app and flow are logically organized.	Yes	Components are separated by purpose.
3	Meaningful Fields	Fields such as Runs Scored, Balls Faced, Fours and Sixes show their purpose.	Yes	Field names are easy to understand.
4	Flow Naming	Player Flow and related screen components use descriptive names.	Yes	Names indicate the function of each flow.
5	Documentation	Project components and their roles are explained clearly.	Yes	Supports easier understanding and maintenance.
6	Modular Design	Objects, Roll-Up Summary, Lightning App and Flow work as separate components.	Yes	Components can be maintained independently.
7	No Redundant Data	Player data and match-performance data are maintained in their relevant objects.	Yes	Avoids unnecessary duplication of records.
8	Error Handling	Required Salesforce field and flow validations help prevent invalid entries.	Partial	Further validation can be added when required.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level
1	Player Object	Salesforce	Stores player details and supports player records.	High

2	Match Performance Object	Salesforce	Stores performance for each player and match.	High
3	Roll-Up Summary	Salesforce	Summarizes related match-performance data at Player level.	High
4	Lightning App & Tabs	Salesforce	Provides the main interface for CRICKSTATS navigation.	Medium
5	Screen Flow	Salesforce Flow	Guides users through player/performance data entry and display.	High

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	4	Objects, fields, tabs, app and flow are organized by function.
Readability	4	Names such as Player, Match Performance and Runs Scored are clear.
Reusability	4	Salesforce components can be reused and extended for more player data.
Documentation / Comments	4	The project structure and purpose of each component are clearly described.
Overall Score	4	CRICKSTATS provides an organized and maintainable Salesforce project structure.
