

Project Executable Files

Date	30 September 2026
Team ID	SWTID-2026-9157
Project Name	Cricket Player Performance Tracking Application (CRICKSTATS)
Maximum Marks	3 Marks

Project Executable Files

This section provides the executable and deployable project materials for **CRICKSTATS – Cricket Player Performance Tracking Application**. The project is implemented using Salesforce features and is organized so that the evaluator can access, demonstrate, and verify the application and its supporting materials.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Salesforce project configuration and application components	Yes
2	Project documentation / setup and usage guide	Yes
3	Salesforce object, field, relationship and configuration details	Yes
4	Player Object and Match Performance Object setup	Yes
5	Screen Flow and Home Page Flow configuration	Yes
6	CRICKSTAS Lightning App and custom tabs	Yes
7	Deployed Salesforce application / org access	Yes
8	Roll-up Summary configuration for player statistics	Yes
9	Functional and performance testing details	Yes
10	Project demo / walkthrough	Yes

Step 2: File / Folder Structure

CRICKSTATS is a Salesforce-based application, so its executable project structure is organized around the Salesforce application configuration and the project submission materials rather than a traditional local software folder structure.

Project Component	CRICKSTATS Structure / Contents
Salesforce Application	CRICKSTAS App – main Lightning application used to access the project features.
Custom Objects	Player Object and Match Performance Object for storing player and match-performance information.
Custom Fields	Player and Match Performance fields for cricket statistics such as runs, balls faced, fours, sixes, overs and wickets.
Relationship	Player–Match Performance relationship for maintaining multiple performance records for a player.
Roll-up Summary	Summarizes related match-performance information at the Player level.
Lightning App / Tabs	Custom tabs and Lightning App provide navigation and access to CRICKSTATS components.
Flows	Screen Flow and Home Page Flow support guided and user-friendly data interaction.
Documentation	Project report, testing information, demonstration material and submission documents.

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Salesforce CRICKSTAS App / project org access
Login Credentials (Demo)	Demo credentials are provided through the authorized Salesforce project environment.
Platform / Hosting Provider	Salesforce Lightning Platform
