

Customer Journey Map

Date	30 September 2026
Team ID	SWTID-2026-9157
Project Name	Cricket Player Performance Tracking Application (CRICKSTATS)
Maximum Marks	2 Marks

Customer Journey Map

Map the customer's experience stage-by-stage, including actions, touchpoints, thoughts, feelings, process ownership and opportunities for improvement while using CRICKSTATS.

Phase of Journey	Stage 1 Discover	Stage 2 Use	Stage 3 Review
Actions <i>What does the customer do?</i>	• Opens CRICKSTATS • Selects the required player or match • Explores the application	• Enters or views match data • Checks player performance • Uses the available flows and tabs	• Reviews performance summaries • Compares player results • Uses insights for decisions
Touchpoints <i>What part of the service do they interact with?</i>	• Lightning App • Custom Tabs • Home Page	• Player Object • Match Performance Object • Screen Flow	• Roll-up Summary • Performance fields • Player/match records
Customer Thought <i>What is the customer thinking?</i>	• "Where can I find player data?" • "Is the app easy to navigate?" • "Can I access match information quickly?"	• "Can I enter data easily?" • "Are the performance details accurate?" • "Can I find the required statistics?"	• "Which player performed well?" • "What does the summary show?" • "Can I use this data for decisions?"
Customer Feeling <i>What is the customer feeling?</i>	• Curious • Interested • Hopeful for a simple experience	• Engaged • Confident when data is easy to enter • Satisfied with quick access	• Informed • Satisfied • Confident in reviewing performance

Customer Journey Map — Process Ownership & Opportunities

Phase of Journey	Stage 1 Discover	Stage 2 Use	Stage 3 Review
Process Ownership <i>Who is in the lead on this?</i>	• Team Lead • UI / Navigation member	• Data Model member • Data Fields member • Flow member	• Team Lead • Data/Analytics contributors
Opportunities <i>How can we improve this stage?</i>	• Keep navigation simple • Use clear tab names • Provide an easy home page	• Validate required fields • Make flows easy to follow • Keep data entry organized	• Show useful summaries • Improve performance visibility • Make results easy to understand

Overall Journey: Discover the application → use the Salesforce objects and flows → review player and match performance through organized records and summaries.
