

Data Flow Diagram

Date: 30 September 2026

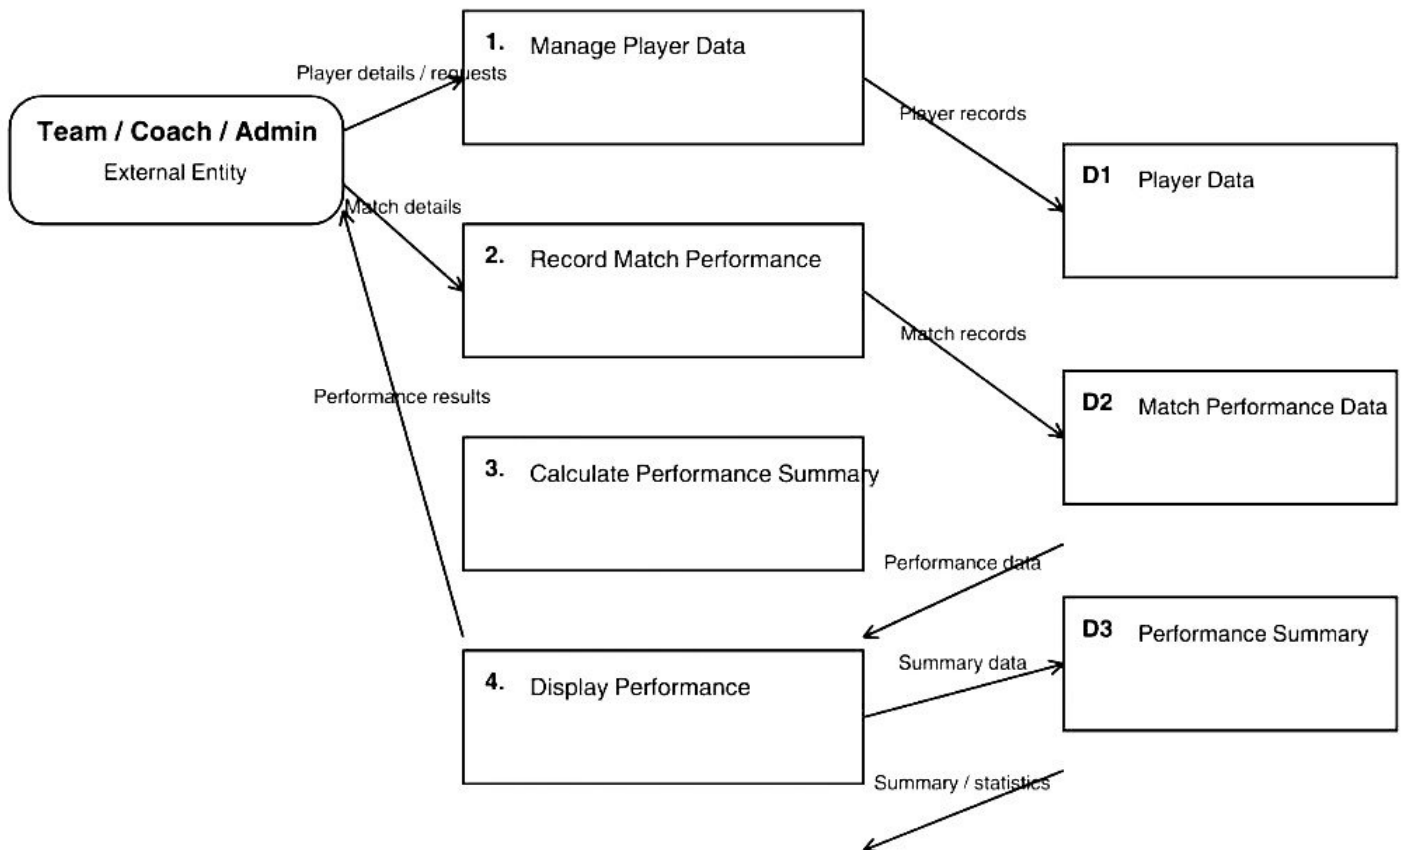

Team ID: SWTID-2026-9157

Project Name: Cricket Player Performance Tracking Application (CRICKSTATS)

Maximum Marks: 2 Marks

Data Flow Diagram

The DFD below shows how data moves through CRICKSTATS between external users, application processes, and data stores.

CRICKSTATS – Main Data Flow

- Users enter and manage player information and match performance details.
- Player and match data are stored for future use and tracking.
- The application calculates performance summaries using the stored match data.
- Roll-Up Summary and application flows help present consolidated player performance.
- The Lightning App provides the interface for users to navigate and view the information.
