Project Name	Cricket Player Performance Tracking Application (CRICKSTATS)
Maximum Marks	4 Marks

Empathy Map

This empathy map describes the needs and experiences of a user of CRICKSTATS. The application helps users organize cricket player and match performance information and view it through an easy-to-use Salesforce interface.

SAYS • “I want player performance details in one place.” • “I need quick access to match statistics.” • “The application should be simple to use.” • “I want accurate performance information.”		THINKS • “Which player is performing consistently?” • “Can I find the required match details quickly?” • “The data should be organized and reliable.” • “I need an easy way to track performance.”
	PERSONA Cricket Coach / Team Manager Role: User of CRICKSTATS Goal: Track and review player performance	
DOES • Enters and views player details. • Records match performance data. • Checks player statistics and summaries. • Uses the app to review performance information.		FEELS • Wants confident and accurate information. • Feels satisfied when data is easy to access. • May feel frustrated by manual record keeping. • Feels comfortable with a simple interface.

Project Insight: CRICKSTATS is designed to reduce manual effort, organize player and match data, and make cricket performance information easier to access and understand.
